

Key Investor Information Document

This document provides you with key investor information about this fund. It is not marketing material. The information is intended to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

MCB DOMESTIC EQUITIES FUND

A MUR denominated sub-fund of MCB Unit Trust (Citi Code: K2JX). This Fund is managed by MCB Investment Management Co Ltd, part of MCB Group

Objectives and Investment Policy

MCB Domestic Equities Fund adopts an active management approach within a medium-to-high risk strategy with the primary objective of achieving long-term capital appreciation through investment in shares quoted on the Stock Exchange of Mauritius (SEM), including the Development Enterprise Market (DEM).

The investment objective of the Fund makes it suitable for investors who are seeking to participate in a well-diversified portfolio of companies quoted on the local stock exchange and who are willing to invest for the long-term. The Fund is also suitable for foreigners willing to have an exposure to

the local stock market without having to purchase individual shares on the market.

Units can be bought and sold once a week on every Friday. Proceeds of repurchases are usually paid to unit holders within 10 business days after the processing date.

All net distributable income is paid out to unit holders once a year in August in the forms of dividends. Unit holders can then choose to reinvest their dividends at no entry fee.

Risk and Reward

The risk category 4 reflects a potentially medium gain and/or loss in the value of the portfolio. This is due to investments in a number of companies listed on the Stock Exchange of Mauritius which operate across diverse sectors.

Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Fund's future risk profile.

The risk category associated with this Fund is not guaranteed and can change over time. The lowest risk category does not mean "risk free".

Your initial investment is not guaranteed.

Significant risk(s) for the Fund include:

Market risk: The performance of the Fund will depend upon the evolution of the Semdex. Consequently, it is very likely that a substantial fall in the index would lead to a similar fall in the value of the Funds.

Economic risk: The performance of the Fund will depend upon the evolution of the main sectors of the Mauritian economy, namely Financial Services, Tourism, Sugar, Industry, Manufacturing and Construction. A downturn in these sectors may negatively impact the value of the Fund.

Fund Charges

The charges and costs are used to cover the Fund's operating costs. These charges reduce the potential growth of your investment.
